

A: You can do this by adding two tags: Q: how to append a request to apache log? I have searched for hours now and can't seem to figure it out. So I have a php script running on apache on ubuntu and I would like to append the output to the apache log. I looked into apache2.conf, but I couldn't find anything. This is what I've been trying, but it seems I'm missing something...

```
StartServers 3 MinSpareServers 3 MaxSpareServers 3
MinSpareThreads 25 MaxSpareThreads 300 ThreadsPerChild 25 MaxClients 300
MinSpareThreads 50 MaxSpareThreads 250 ThreadsPerChild 50 MaxClients 50
LogLevel alert LogFormat "%h %l %u %t \"%r\" %>s %b" vcl CustomLog
"/var/log/apache2/access.log" vcl ErrorLog "/var/log/apache2/error.log" CustomLog
"/var/log/apache2/access.log" combined env=!dontlog LogFormat "%h %l %u %t \"%r\"
%>s %b" common CustomLog "/var/log/apache2/access.log" common ErrorLog
"/var/log/apache2/error
```
